PROFORM PANELS LTD.

DUCT & ACCESS PANELLING

DESCRIPTION

DUCT AND ACCESS PANELLING

Duct and Access panels are manufactured to suit site specifications and are available in a choice of melamine faced chipboard, high pressure laminate, solid grade laminate and real wood veneer.

Unlike standardised modules, this allows adjacent sets to be fitted closer to intersecting walls and cubicles, and also closer together which while being more attractive also makes unauthorised access to service compartments more difficult.

Applications

Proform Duct and Access panelling is suitable for WCs, urinals and wall hung wash hand basins, the dimensions and number of panels can be manufactured to whatever specifications are required.

When considering Duct and Access panelling specifications, attention should be given to size and weight of access panels for maintenance purposes.

Shower panelling is also available manufactured from water resistant solid grade laminate with horizontal edges rebated forming an overlap to prevent direct ingress of water.

Fixings

Proform Duct and Access panels can be mounted to framework using concealed 'push fit' or 'lift off' brackets. Larger panels can be hinged to allow safer access for maintenance, a cylinder lock can also be added for additional security.

Colour

Proform Duct and Access panels are available in an extensive range of colours, patterns and finishes, depending on the material selected.

Sizes

Proform Duct and Access panels can be manufactured to suit any specification.

Proform reserve the right to change any or all specifications
