BENCH SEATING

SHEELIN BENCH SEATING

The Sheelin bench seating range offers the finishing touch to any changing or welfare facility. It's straight line design incorporates quality fixtures, fixings and finishes to give a stunning overall appearance.

The extreme strength and rigidity of the range ensures that the demands of high usage areas are surpassed without compromising style or aesthetics.

The framed structure is manufactured with a robust 38mm mild steel box section and is predominantly welded to aid speed of assembly. Due to this, minimal on site installation time is required to fit laths and ties bars, reducing costs and attendance times considerably.

Due to the important issues with regards to Health and Safety requirements within changing areas, all frames are fitted with adjustable feet and floor fixing brackets as standard to accommodate uneven floors and to ensure structural stability at all times.

LOCKERS

SHEELIN LOCKERS

Six frame colours and an almost endless choice of laminate finishes and patterns offers the opportunity to create a unique colour co-ordinated identity for every interior.

Anti Bacterial protection can be achieved by using protected laminates and anti bacterial coatings on the aluminium framework.

Built to last all major parts are impervious to moisture, offering mould resistance and increased life expectancy when exposed continually to humid environments or wet clothing.

6mm compact laminate carcass and 13mm thick compact laminate doors and end panels offer maximum durability.

Sheelin lockers modular construction allows flat pack delivery to site, reducing transportation costs and on site damage prior to installation.

All locks are strong, reliable and of a tried and tested design. With several key options and removable barrels that can be incorporated if required.
